

**ORTHODONTIC
PARTNERS™**

OP Welcomes Lancaster Orthodontic Associates

We are proud to announce the addition of Lancaster Orthodontic Associates (LOA) to the Orthodontic Partners family! This Pennsylvania-based practice is the first practice in the state to join OP, and has been serving their community for over a century. In fact, LOA (then known as Long Orthodontic Associates) was one of the first orthodontic practices to be established in the entire state of Pennsylvania.

The team of doctors at LOA - Drs. Manny Lamichane, Tim Snyder, Sarah Wentzel, and Kristin Connors - are building a legacy of giving back through education and community engagement. Dr. Lamichane has trained orthodontists in digital orthodontics across the country and worldwide, has lectured at both Harvard and Hershey Medical School, and has served as the President of the Lancaster Dental Society. Dr. Snyder has completed advanced training in SureSmile and Invisalign, and taught courses at the University of Pittsburgh. In addition to their roles at LOA, Drs. Wentzel and Connors are both part of the craniofacial team at the Lancaster Cleft Palate Clinic, where Dr. Wentzel also serves on the board.

Dr. Snyder expressed excitement about this next chapter for the practice, saying: "We decided to join OP because of the people involved and the practices that had already joined; we have such respect for them all. LOA is excited to join forces and bring our 'relentless positive energy' to the rest of the OP family!"

We have no doubt that LOA is an invaluable addition to our growing network of practices and are honored to be part of their legacy moving forward. Be sure to extend a warm welcome to this fantastic team!
